# VETAPALEM VENKATA NARENDRA KUMAR

Hyderabad, Telangana 500016, India | +91 6304095526 | vnarendrakumar.work@gmail.com
Linkedin| Github

Software Engineer with 3+ years of experience developing enterprise backend applications using Java, Spring Boot, Hibernate, REST APIs, and SQL, with additional experience in React.js frontend development. Familiar with designing and implementing RESTful services, integrating JWT-based authentication and authorization, optimizing Oracle SQL queries, and contributing to the modernization of legacy applications into Spring Boot microservices. **Possess working knowledge** of Redis, Apache Kafka, and distributed system concepts within microservices architectures. Skilled in Agile/Scrum methodologies, CI/CD workflows, JUnit, Mockito, Git, and delivering scalable, reliable software for large-scale enterprise applications.

## PROFESSIONAL EXPERIENCE

### Teksystems Global Services – Hyderabad, Telangana, India

***Software Engineer*** *| May 2025 – Present*
***Associate Engineer*** *| Oct 2023 – Apr 2025*
***Technical Trainee (Internship)*** *| Feb 2023 – June 2023*

*Promoted to Software Engineer in May 2025 for consistently delivering high-impact projects and demonstrating technical leadership*

- Developed Spring Boot REST APIs and backend services as part of the organization's microservices modernization initiative, following existing architecture guidelines and clean coding principles.
- Improved data access performance by optimizing SQL queries in Oracle, enhancing application performance and response times.
- Integrated JWT-based authentication and role-based authorization into REST APIs, ensuring secure access to protected backend resources.
- Supported CI/CD workflows using Jenkins and Git, participating in build, deployment, and release processes for backend services.
- Contributed to the migration of a legacy Jersey application to Spring Boot microservices architecture by implementing business logic, backend APIs, and performance improvements.
- Collaborated with teams working with Redis and Apache Kafka within the microservices ecosystem, gaining practical exposure to distributed caching strategies and event-driven communication patterns.
- Collaborated with developers through code reviews, technical documentation, and knowledge-sharing sessions to maintain coding standards and improve software quality.
- Wrote unit and integration tests using JUnit and Mockito to improve test coverage, increase reliability, and reduce production defects.

## TECHNICAL SKILLS

**Programming Languages:** JavaScript, Java, Python, SQL

**Backend Technologies:** Spring Boot, Spring Framework, Spring Security, Hibernate ORM, Spring Data JPA, REST APIs.

**Frontend Technologies:** React.js, JavaScript, jQuery, AJAX.

**Databases:** Oracle, PostgreSQL, MySQL.

**Testing:** JUnit 5, Mockito, Unit Testing, Integration Testing.

**Methodologies & Architecture:** Agile/Scrum, Microservices Architecture, Layered Architecture, Design Patterns, Object-Oriented Programming (OOP), RESTful APIs, System Design Fundamentals, Performance Optimization, Code Review

## PROJECTS

### Hotel Reservation & Front-Desk Management System (Enterprise Project)

Java, Spring Boot, REST APIs, Oracle, Hibernate, JWT, Microservices, Maven

- Developed Spring Boot REST APIs and backend services for the Reservation and Rewards modules, implementing business logic, validations, DTO mapping, and centralized exception handling for enterprise hotel operations.
- Contributed to the modernization of a legacy Java EE/Jersey application into Spring Boot microservices by implementing backend APIs, improving maintainability, and supporting scalable service-oriented architecture.
- Optimized Oracle SQL queries and investigated production issues using SQL Developer and Splunk, improving application performance and ensuring high availability of revenue-critical hotel operations.
- Built and integrated React.js components with Spring Boot REST APIs for reservation, guest profile, and loyalty workflows, ensuring secure communication using JWT-based authentication and authorization.
- Collaborated with cross-functional teams in an Agile environment to deliver business features, perform code reviews, support production incidents, and maintain coding standards across enterprise applications.

### MedInfo – Secure Medical Information Management System | Backend

*Java, Spring Boot, Spring Security, JWT, Hibernate, PostgreSQL, REST APIs, Maven*

- Developed a secure Spring Boot backend application that enables users to manage medical profiles and emergency contacts, exposing RESTful APIs using a layered architecture (Controller, Service, Repository).
- Implemented stateless authentication and authorization using Spring Security, JWT, BCrypt password encryption, and role-based access control to secure protected APIs.
- Designed and developed CRUD APIs for medical profiles and emergency contacts using Spring Data JPA, Hibernate, DTO pattern, request validation, and centralized exception handling.
- Built a secure public emergency access API using UUID-based identifiers, enabling emergency responders to retrieve critical medical information without authentication while preventing IDOR vulnerabilities.
- Integrated PostgreSQL with Spring Data JPA and Hibernate, implementing entity relationships, custom repository methods, and clean architecture principles to build a scalable and maintainable backend application.

## EDUCATION

**Bachelor of Technology (B.Tech) in Computer Science and Engineering**

Malla Reddy College of Engineering and Technology, Hyderabad, Telangana, India

CGPA: 8.46/10

Graduated: 2023

## ACHIEVEMENTS & CERTIFICATIONS

• **SPOT Award (May 2023)** – Received the SPOT Award (May 2023) for outstanding technical contributions and high-impact delivery during the early stages of my career.

• **Career Progression** – Promoted from Technical Trainee to Associate Engineer to Software Engineer for demonstrating strong technical skills and consistent delivery

• **Technical Training** – Conducted 4-day React development workshop for 50+ students covering JavaScript, component architecture, state management, and app deployment
